Louisiana State University of New Orleans
Department of Economics and Finance

He/His/Him

RESEARCH INTERESTS

Empirical Corporate Finance, Empirical Asset Pricing, Financial Institutions and Bank Risk, Analyst and Insider Behavior, Machine Learning and Large Language Models in Finance.

EDUCATION

Louisiana State University of New Orleans, New Orleans, LA

Ph.D. in Financial Economics Spring 2027 (Exp.)

M.Sc. in CSE 2027

M.Sc. in Finance 2026

Texas Tech University, Lubbock, TX

M.S. in A. Applied Economics 2024

IIUM, Kuala Lumpur, Malaysia

B.Sc. and M.Sc. in Economics 2014 / 2018

TEACHING EXPERIENCE

Louisiana State University of New Orleans, New Orleans, LA

Instructor of Record

Principles of Macroeconomics, Undergraduate, Face to Face

Fall 2026

Investments, Undergraduate, Online

Summer 2026

Louisiana State University of New Orleans, New Orleans, LA

Tutorial Instructor

Operations Management, Tutorial Sessions, Face to Face

Summer 2026

EMBA Business Statistics, Tutorial Sessions, Face to Face

Spring 2023

Texas Tech University, Lubbock, TX

Teaching Assistant

Macroeconomics and Microeconomics

2023 to 2024

Data Science, Online

2023 to 2024

JOB MARKET PAPER

Subsidies as Attention Shocks and Their Impact on Insider Activity

with J. A. Pérez-Amuedo, R. Houston, and M. K. Hassan

Under review at *Financial Management*. Accepted for presentation at the FMA 2026 Annual Meeting.

How do government subsidies shape the information environment of public firms? Linking public subsidy data to analyst data and SEC Form 4 insider transactions for U.S. public firms over 2000 to 2023, we show that subsidies operate as *attention* events rather than *information* events. Analyst coverage intensity rises by approximately 4.8 percent in a panel OLS, and by 8.7 percent in a matched difference-in-differences design over the five-year award window following the first receipt. The effect builds for three years post-award and scales with award size. Yet the content of analyst output does not change. Consensus recommendations show a contemporaneous improvement, but no causal effect in

the matched design, and forecast disagreement is flat once dispersion is scaled by the consensus mean. The unscaled increase using both I/B/E/S and Zacks data is a price-level artifact. Insiders respond decisively, with open-market trading volume rising 47 percent after subsidies, tilting toward net selling, and concentrating in opaque firms where outside evaluation is hardest. These post-award sales are less predictive of future returns than ordinary insider sales, consistent with opportunistic selling around subsidy-driven attention rather than informed trading. Government awards shift attention and liquidity rather than information, and corporate insiders, rather than analysts, appear to convert that attention into private benefits.

PAPERS UNDER REVIEW

The Limits of Flexibility: A Controlled Multi-Domain Study of Reinforcement Learning in Finance

Second Essay

with M. M. Ferdous and M. K. Hassan

Under review at *International Review of Financial Analysis*.

Hidden Duration Losses and Bank Crash Risk: Evidence from the 2022 UK Gilt Crisis

with M. K. Hassan, J. A. Pérez-Amuedo, M. M. Ferdous, and L. Pezzo

Major revision, *Quarterly Review of Economics and Finance*.

Unrecognized Held-to-Maturity Losses and the Repricing of US Bank Equity

with M. K. Hassan and J. A. Pérez-Amuedo

Under review at *Finance Research Letters*.

WORKING PAPERS

Information Conflict and CEO Insider Trading

with Y. Kaffash Saligheh and L. Pezzo

Accepted for presentation at the SFA 2026 Annual Meeting.

The Price of Disagreement: Identification and Measurement Dispersion Shocks

<i>Local Nonfarm Opportunities and Migration Decisions: Evidence from Bangladesh.</i>	

RESEARCH EXPERIENCE

Graduate Research Assistant	2024 to Present
Division of Business and Economic Research (DBER), Louisiana State University of New Orleans	
Research on the transition of U.S. tourism, database dynamics, and impact analysis using big data.	
Graduate Research Assistant	2022 to 2024
Texas Tech University, Lubbock, TX	
Research on the transition of U.S. agriculture, the dynamics of consumer tastes, growth of dollar stores, and event analysis using big data.	
Research Fellow , Research and Policy Integration for Development	2023
Senior Research Associate , Policy Research Institute of Bangladesh	2022
Monitoring and Evaluation Officer , WorldFish	2022
Research Associate , Bangladesh Institute of Development Studies	2018
Research Assistant , University of Malaya, Malaysia	2015

HONORS AND AWARDS

- Graduate Student Assistantship, Louisiana State University of New Orleans (2024 to Present).
- 1st Prize, USDA-AAEA Data Visualization Challenge, AAEA Annual Conference (2023).
- Distinguished Graduate Student Assistantship, Texas Tech University (2022 to 2024).
- Invited Speaker, U.S. State Department Foreign Service Institute (2023, 2024).
- GRE: Quantitative 168, Verbal 163 (331/340).

SKILLS

Programming: Python, R, Stata, MATLAB, SQL

Machine Learning: PyTorch, TensorFlow, XGBoost, LightGBM, Stable-Baselines3

Market and Firm Data: WRDS, CRSP, Compustat, I/B/E/S, Zacks, SEC EDGAR and Form 4, TRACE, DealScan

Other Tools: L^AT_EX, Git, GTAP, GIS

Languages: English (fluent)

Hobbies: Pickleball, Tennis
